As a recent graduate with a strong foundation in programming languages such as Java, Python, and C, I bring theoretical knowledge and a passion for problem-solving to the table. My academic background includes coursework in algorithms, data structures, and software development methodologies. Eager to apply my skills in a real-world setting, I am adaptable, quick to learn, and enthusiastic about contributing to innovative projects. My commitment to staying current with industry trends reflects my dedication to continuous learning and growth.

Projects

My Page

- The main object of this project is to create a social media website
- .Worked as a team mate.
